

Networks

We are committed to providing new personalised levels of service to a select number of networks and their members.

The network service package includes:

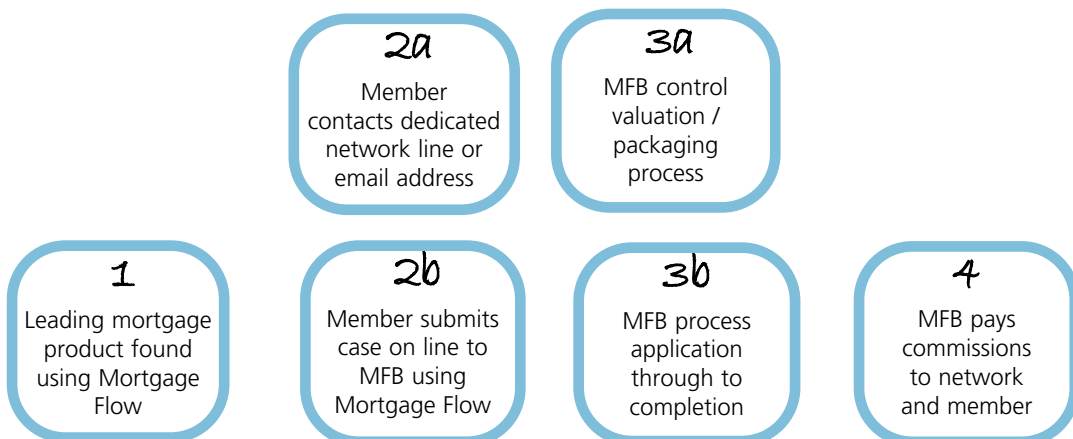

- Exclusive member access to market leading rates
- Top producing network members will receive exclusive member access to the leading Buy to Let mortgage broking and portfolio management tool – 'Mortgage Flow'
- Competitive commission rates for the network and its members
- Use of preferential service levels with lenders
- Management of the packaging and valuation process

We are also keen to maximise business opportunities within networks through:

- Network white labelled marketing materials and websites
- An allocated marketing budget for internal network based campaigns
- A dedicated network support marketing executive
- Regular product, lender and market update for members, in line with network communication policies
- Extranet website to support network members

Our service proposition is radically different from other packager operations. We don't use a factory approach to service, and we hate the concept of phones being answered by automated response! Each network member is given a dedicated case manager throughout the process.

The process – 4 simple steps
